«eBanking – but secure!» now also optimized for your smartphone

The University of Lucerne has been running their free-to-use website

www.ebankingbutsecure.ch for three years now. Anyone interested can find practical information on important measures and rules of conduct for safe eBanking. Several Swiss financial institutions now offer their customers access to their accounts while out and about via “mobile banking”, too. We therefore now also offer all «eBanking – but secure!» information in a clear format for smartphones, making them simply and easily available.

Lucerne, 13/11/2013 – «eBanking – but secure!» aims to provide the general public with clear and easy-to-understand security information for eBanking. There are dangers lurking when eBanking via your smartphone, also called «mobile banking», too, against which you should protect yourself, and in as simple a way as possible at that. The easy-to-understand information on www.ebankingbutsecure.ch will therefore now be displayed in a clear format on smartphones, too. All topics, from basics such as logging out down to more complex issues such as checking a certificate’s electronic fingerprint, have now been optimized for display on your smartphone. Current issues discussed in our Security News; instructions; info sheets; or demo clips can now also be retrieved from your mobile phone and are all waiting to be discovered by you.

The «eBanking – but secure!» portal is supported by financial institutions in Switzerland and Liechtenstein - the editorial responsibility for all multi-lingual content lies with the University of Lucerne.

«eBanking – but secure!» service

The www.ebankingabersicher.ch website is one of four services the University of Lucerne offers to their now 36 financial institution partners. In a holistic approach, «eBanking – but secure!» also runs public consumer courses. In addition, we train our financial institution partners' helpdesk staff and customer consultants in current and security-related issues, and we are also monitoring the Swiss media for any topics related to eBanking security.
